

Experience the Simplicity of clozapine management

- We have received Clinical Laboratory Improvement Amendments (CLIA) certification, and are regularly surveyed and inspected. We are monitored for compliance in quality assurance, personnel, proficiency testing, and policy and procedural guidelines.
- Horiba® desk top hematology analyzer provides a 16 parameter histogram and is intended for use in clinical laboratories and small clinics.
- Capillary blood testing is a safe and effective tool for routine blood monitoring i.e. blood glucose, PT/INR, lipid levels and CBC.
- We can eliminate the anxiety of a venipuncture, our equipment only requires a small amount of blood.
- No groups, no appointment, less invasive, no venipuncture
